Your Best Belongs in Seda®

Seda® Food Containers for salads, entrees, sandwiches, desserts and more!

Quality in food packaging is among the top attributes customers consider the most important in quick service or fast-casual restaurants*. They expect your food creations to travel without leaking or spilling and remain fresh and flavorful. Food containers from Seda® are made of the highest quality materials, with tight-fitting lids, to protect food and let your customers take away your very best.

**BENEFITS OF FOOD CONTAINER INNOVATION FROM SEDA®**

- **Complement your menu:** containers come in a variety of sizes, ideal for a breadth of menu items and portion sizes. Whether it’s a fresh kale and apple salad or an oven-baked entree such as homemade lasagna, it’s the packaging that helps keep the real focus on your food.

- **Consumer preference:** across the board, there is waning consumer preference for foam and plastic containers. Conversely, consumer preference for paper is increasing significantly. Let us help you convert consumer feedback into the energy that drives your same store sales comps.

- **Sustainability made simple:** Seda® offers you a choice when it comes to the environmental impact of your business. Our food containers replace traditional plastic and foam containers with packaging made from fully recyclable fibers harvested from certified sustainable forests. We even have a range of biodegradable and compostable options available.

- **Delivering your brand:** the state-of-the-art printing technology from Seda® combined with the containers’ high quality materials makes superior printing easily achievable, even for colors that can be challenging to produce. Ask your sales representative about low minimum custom programs.
